

Dendrobium Studies

- A) Provide a brief description of the distribution and the morphology of the genera *Dockrillia* and *Epigeneium*. Describe one of the highly awarded species of one of these genera.
- B) Provide a brief description of the distribution and the morphology of the *Dendrobium* section *Callista* and of *D. chrysotoxum* and *D. thyrsoiflorum*.
- C) Provide a brief description of the distribution and the morphology of the *Dendrobium* section *Dendrobium* and of *D. moniliforme*, *D. nobile* and *D. signatum*.
- D) What floral characteristics do you expect to find in an award-quality awarded *Den. cuthbertsonii*?
- E) Describe the desirable floral characteristics of 'nobile-type' dendrobiums. What flower count do you expect of an awardable one?
- F) *Den. Gattou Sunray*, a cross of parents within sections *Callista* and *Dendrobium*, is widely seen throughout the USA. Provide a brief description of the hybrid and characteristics contributed from each of the parents.
